AL-130: As an underwriter, the credit committee runs end to end on each application and saves one run record

What was built

I built the credit committee as one fixed LangGraph flow, so the steps always run in the same order and every result goes into one run record. If a step keeps failing, the run is saved as failed with the reason and no recommendation. A Firestore listener starts the run when an application becomes Applied and moves it to AI Deliberated when the run finishes. Dumi's part saves every call as an `ai_calls` document, and my part passes it the IDs it needs.

Pull requests

PR	Title	Merged	By
#139	AL-201 Accept a HELOC in the valuation endpoint, the valuation agent and the policy gate	2026-11-03	Nic
#152	AL-246 Work out the risk tier and LTV band	2026-11-03	Nic
#165	AL-138 Add the LangGraph committee flow and a local runner	2026-11-04	Nic
#168	AL-139 Add bounded retries, a run time budget and re-run	2026-11-06	Nic
#173	AL-290 Pass the run, application and broker IDs to every committee step	2026-11-06	Nic
#176	AL-141 Start the committee automatically when an application becomes Applied	2026-11-07	Nic
