Test case: AL-256

Story: iOS: sign out from Your details

Tested by: Ibrahima Toure
Date run: 6 Nov 2026
Build: `main` at commit `66e32f0`

Preconditions

- Firebase emulators started with the seed data (`firebase emulators:start --project demo-al --import=./seed-data` in `al-core`), al-core and al-ai running locally, the app on the iPhone 17 simulator. Seeded logins use the demo password from `al-core/scripts/seed.js`.
- Emulators running. `noprofile@test.com` made in the Auth emulator with no profile in Firestore, and a new Google account (`newgoogle@test.com`) added through the emulator's Google screen.

Steps

#	Criterion	Steps	Expected result	Automated check	Result
1	1	Continue with Google as a first-time user. Then sign in as a user with no profile from the home gate.	Your details shows a Sign out button both times.	ProfileDetailsViewModelTests.SignOutIsOfferedBeforeAnythingIsSaved	[x] Pass [ ] Fail
2	2	Tap Sign out.	Signed out of Firebase and Google, Welcome opens, no profile saved (check the Emulator UI).	AppSessionTests.SignOutGoesBackToWelcomeAndStartsTheScreensAfresh, plus the Emulator UI check	[x] Pass [ ] Fail
3	3	Make sign-out fail (unit test fake).	Your details stays open and says why.	AppSessionTests.AFailedSignOutStaysPutAndSaysSo	[x] Pass [ ] Fail
4	4	Fill in the form, tap Continue and look at Sign out while it saves.	Sign out is off while saving.	ProfileDetailsViewModelTests.SignOutIsOffWhileContinueIsSavingTheProfile	[x] Pass [ ] Fail

Automated test run

iOS unit tests (`AgenticLenderTests`) on `main` at `66e32f0`, iPhone 17 simulator (iOS 26.5), 6 Nov 2026: **651 passed, 0 failed, 0 skipped**. The UI tests named above (`AgenticLenderUITests`) need the emulators running and were not part of this run.

Notes

- Step 1, home gate: signing in as `noprofile@test.com` got 404 from GET /core/me and opened Your details with Sign out under Continue.
- Step 1, Google: Continue with Google with a new emulator account opened Your details ("Signed in as newgoogle@test.com") with Sign out under Continue.
- Step 2: Sign out went back to Welcome both times. No profile was saved: al-core got only GET /core/me (404) during the run and no request to create one, and `noprofile@test.com` has no users document in Firestore.
- Steps 3 and 4 (a failed sign-out, and Sign out being off while Continue saves) were checked by the unit tests named above, which passed in the run above; they can't be made to happen by hand on the emulators.
